# **Baltics and Beyond: Chasing the Legacy of Great Duchy**

Once upon a time there was a great country which stretched from the Baltic Sea to the Black Sea which served as an outpost of European civilization: Great Duchy of Litva (Lithuania). It guarded Europe from various invasions of the East. It is our pleasure to invite you to join our group on a journey through its heirs-Belarus and Lithuania to see fascinating historical hidden gems in Central and Eastern Europe. America is a nation of immigrants and many people came to this country from the places that we will visit: American Revolutionary war hero Tadeusz Kosciuszko; the author of God Bless America, composer Irving Berlin and many others. This tour will bring you to experience art, castles, places of worship, Eastern-European American connections
